## Professional Summary

Computer Science graduate with strong skills in software development, programming principles, and MERN stack development. Proficient in writing clean code, and building scalable web applications. Seeking an entry-level Software Developer role to apply MERN expertise and contribute to innovative projects. Passionate about problem-solving, API development, and delivering efficient user-focused solutions.

## Education

### Bachalor in Computer Application (BCA)

Js universit Shikohabad, Mainpuri Road, Shikohabad (UP)

Graduated at: 2024

### intermediate

Shobha Girls intermediate Collage Rampur

## Projects

### E-Commerce Web Application with Admin Panel (MERN Stack),(Stylehub)🔗

Built a full-stack e-commerce application with an admin panel using the MERN stack. Implemented product management, cart, checkout with GST & shipping via **RESTful APIs**, and secure authentication for users, while enabling admins to manage inventory, users, orders, and analytics through **CRUD endpoints**. Integrated Cloudinary for image storage, and deployed the app on Render ensuring scalability, security, and smooth user experience.

### Cravehub , a Token-Based Food Ordering System (MERN Stack) 🔗

I developed a full-stack food ordering platform using **React, Node.js, Express, and MongoDB**, where users can browse products, add items to their cart, and place orders seamlessly. After checkout, the system automatically generates a unique pickup token that customers use at the restaurant to collect their food. I built secure **REST API** endpoints for cart operations, and order management. The admin dashboard allows restaurant staff to track live orders, verify tokens, and manage order statuses in real time. optimized database queries, and followed **MERN** best practices to ensure scalability, performance, and smooth user experience. This project demonstrates strong skills in API development, state management, backend logic, and real-world problem solving.

## Skills

**Languages:** Node.js , JavaScript, HTML, CSS.

**Fremwork** : React.js, Express.js , Bootstrap, Tailwind.

**Database Management:** Mongodb.

**Version Control:** Using Git to manage and track project progress.

**other** : Git & Github, **RESTapi**, Postman, **Redux & Redux Toolkit** , Agile, jira.

## Language

Hindi
