AI /API PROJECT

CUISINE 🌐

DEVELOPED CUISINE, AN **AI-POWERED** RECIPE GENERATOR WEB APPLICATION PROVIDING PERSONALIZED RECIPE RECOMMENDATIONS BASED ON SELECTED INGREDIENTS.

BUILT A RESPONSIVE REACT FRONTEND WITH A SECURE NODE.JS AND EXPRESS BACKEND, INTEGRATING THE **GEMINI AI API** FOR DYNAMIC RECIPE GENERATION.

IMPLEMENTED A SCALABLE COMPONENT-BASED ARCHITECTURE, MANAGED ENVIRONMENT VARIABLES USING .ENV, AND DEPLOYED THE APPLICATION ON RENDER.

PROFILE

Computer Science graduate with strong foundations in web development, data structures, and MERN stack development. Proficient in building scalable full-stack web applications, RESTful APIs, and writing clean, maintainable code. Seeking an entry-level web Developer role to apply expertise in React, Node.js, Express, MongoDB, and problem-solving to deliver efficient, user-focused solutions.

WORK AND PROJECTS EXPERIENCE

Stylehub E-Commerce 🌐

Built a full-stack e-commerce application with an admin panel using the MERN stack. Implemented product management, cart, checkout with GST & shipping via RESTful APIs, and secure authentication for users, while enabling admins to manage inventory, users, orders, and analytics through CRUD endpoints. Integrated Cloudinary for image storage, and deployed the app on Render ensuring scalability, security, and smooth user experience.

Cravehub , a Token-Based Food Ordering System (MERN Stack) 🌐

Developed a full-stack MERN food ordering platform enabling users to browse products, manage carts, and place orders. Implemented secure REST APIs for cart and order management with automatic pickup token generation for order verification. Built an admin dashboard for real-time order tracking, token validation, and status management. Optimized MongoDB queries and followed MERN best practices to ensure scalability, performance, and a smooth user experience.

Skills demonstrated : React.js, Node.js, Express.js, MongoDB, REST APIs, Admin Dashboard, Order Management, Database Optimization, Full-Stack Development

SkillBridge | MERN Stack Application 🌐

Developed a scalable skill-based service platform connecting customers with verified professionals. Implemented role-based modules for Customers, Workers, and Admin with secure service booking and **Razorpay** payment integration. Built worker profiles, smart wallet for earnings tracking, and automated Bank/UPI payouts. Designed an admin dashboard for **KYC verification**, financial management, and analytics. Implemented **Google OAuth, JWT, and OTP-based authentication**. Tech stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB.

SKILLS

Languages: Node.js , JavaScript, HTML, CSS.

Fremwork : React.js, Express.js , Bootstrap, Tailwind.

Database Management: Mongodb.

Version Control: Using Git to manage and track project progress.

other : Git & Github, **RESTapi**, Postman, Redux , Agile, jira.
